Calculation Groups

2

In the model explorer, users can view and manipulate calculation groups and their calculation items, enabling the creation and editing of these groups directly in Desktop.

Calculations

Deduplication rules for composite models

Previously, duplicates were automatically renamed (e.g., 'products 2'), causing confusion about their source. Ensuring distinct names is crucial for clarity in composite models.

Settings ✕

☑ Automatically connect to tables added later

☑ When items from different sources have duplicate names, add text so you can tell them apart

Add this text	(marketing)
As a	Suffix ⌄
